

Besides the extraordinary activities (concerts, exhibitions, masterclasses, workshops...) the Music Museum organizes, according to previous reservation, a fix set of activities to the public of all ages, specially to the young ones.

These activities are done during the period of the museum's opening hours, and they can be prepared along with educators, teachers and professionals of cultural groups. There are pedagogic, theme and ludic activities available which allow the contact with the world of music and musical instruments.

To small groups and individual visitors, the Museum has 5 mp3 players for audio visits (in Portuguese and German) which help the visitor during the visit, presenting an exhibition using audio support of some instruments and small explanations.
